

Powerful Peace of Mind for Yacht Owners Now Available for a Modest Investment

When a treasured pleasure yacht is moored in the harbor or tied up at the dock and the owner can't be nearby, now thanks to modern technology there is a way to have someone—or something—stand watch over the valued property. Yacht owners who worry about battery levels, bilge levels, intruders and uncontrolled boat movement, can utilize the simple, effective technology offered by Yacht Protector®. Pricing for the Starter System begins at \$699.

Other packages offering more sensors and service levels are available at additional cost.

This powerful system utilizes a series of sensors, which are strategically placed on the vessel, to monitor and report wirelessly to main core unit. The basic system includes the core unit and four sensors (up to a total of 16 sensors) to detect intrusion, water, battery, and shore power. Other sensors can detect temperature, smoke, and photo

capture. Live 24-hour monitoring service is offered on an annual fee basis. Typically, owners install the system themselves, although installation service is available.

Phone App Makes it Easy

Rick Hathaway, Marine Specialist at The Hope Group, works closely with boat owners to create the security system that best meet their circumstances and needs. "A current customer has two vessels, each equipped with a core unit and selected sensors. The communication from both systems is easily managed through an app on his smart phone," said Rick. According to Rick, the owner handled the installation directly.

For example, the Cruiser Version kit comes with four color-coded, sealed, plastic-armored sensors units, each with its own internal battery; blue for the bilge, with a pre-connected, wired bilge-water sensor; brown for "presence," meaning it detects movements of someone aboard; green is for battery levels; and red is for shore power. Installation is simple thanks to the wireless, battery-powered sensors that mount with 3M adhesive strips. There is no requirement for drilling or wire splicing.

Cruiser Version Shown

Yacht Protector Alerts

The Smart Yacht wireless system is available in various configurations. But, regardless of the size of the system, once an alert is triggered by a sensor, a push message alert is sent to all of the designated users along with an email describing the alert. The system will escalate the alerts if there is no acknowledgment to the message.

YACHT PROTECTOR™

SEE YOUR BOAT'S CONDITIONS & LOCATION AT ANY TIME!

SMART WIRELESS MONITORING & TRACKING SYSTEM

SET YOUR GEO-FENCE TO PROTECT YOUR BOAT ANYWHERE!

EASY TO INSTALL

WEATHER, FORECAST & TIDE INFORMATION

BOAT INSURANCE DISCOUNTS AVAILABLE!

FEATURES:

- Monitor with your mobile phone or web.
- GPS tracking, current position, historical info day/week/month.
- Geo-Fence alerts if the boat moves out of your designated area.
- Displays your boat's weather and tide information.
- Yacht Key Fob silences alarms when authorized users on board.
- Yacht Tag Sensors for wave runners, tenders and equipment.
- Select your language and all information, data, dates and alerts will conform to your language choice.
- User friendly customizable App/Web settings.
- Remote activation and deactivation of alerts.
- Capability of up to 16 Sensors per each CORE.
- Monitor multiple boats or fleet with one account.
- 2-year System warranty.

TECHNICAL SPECS:

- CORE Power Supply: 12V/24V (2A)
- CORE dimensions: 6.5" x 4" x 1.25"
- Sensor dimensions: 3" x 3" x 1"
