

Marine Hose & Fittings

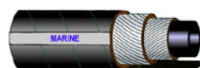

Dixon Valve & Coupling manufactures a complete line of adapters, couplings, hose menders, king nipples, nozzles, quick connect fittings, repair and replacement parts.

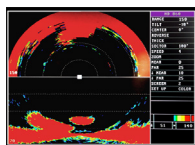

Parker Hydraulic Hose meets SAE, USCG and ISO standards. Used with steel, stainless steel and brass field attachable or crimped fittings. The Hope Group fabricates marine steering, power tilt and marine hydraulic hose assemblies.

Parker Marine Hose manufactures a wealth of general purpose and speciality hose products. Parker's offering includes Armada Fuel, Wet Exhaust and Multi-Purpose Hose, Wave Master Barrier Fuel Line and Vent Hose and Thorobraid Clear Marine FDA/NSF for potable water applications.

Marine Custom Motion Systems

The Hope Group provides hydraulic, pneumatic and electrical "customized systems" solutions to marine motion applications for the following:

- Anchor Windlasses
- Bow / Stern Thrusters
- Hatch & Windshield Lift Systems
- Steering Systems
- Stabilizer Systems
- Winch / Capstans
- Self-Contained HPU's
- Sonar Systems

Wesmar Sonar (top) and Wesmar Stabilizer

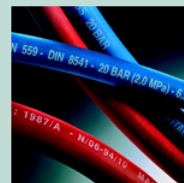

Marine Control Systems

Parker Marine Hydraulics offers a broad range of products for Marine motion control applications including: steering systems; proportional controls; fuel and water systems; central hydraulic power systems and customized solutions.

IQAN by Parker is a state-of-the-art system for electronically controlling and monitoring hydraulics on marine vessels. IQAN also communicates with other onboard systems and displays data for diagnostic information.

Marine Steering & Motion

Jastram Engineering designs and manufactures a whole line of marine steering systems, including manual steering, modular systems including controls, motor starters and alarms, hydraulic power systems and more.

Uflex USA manufactures hydraulic steering systems specifically for the marine environment, using materials and working process which offer long life and safety for the most extreme conditions.

Accu-Steer provides high performance hydraulic control of steering systems for yachts and commercial vessels of all classes. Each unit is completely tested after assembly and each unit is identified by a serial number with its test results on file.

Wesmar manufactures bow and stern thrusters including hydraulic and electrical dual propeller rotating and single propeller systems and electronic stabilizer systems that resist wave roll for a smoother ride and less noise.

The Hope Group owns and operates Parker Stores at its branch locations in five New England states. Each store has 3,000 parts on hand and can provide customers with access to the fastest, most immediate local replacement of any ruptured hydraulic hose assembly.

Marine Filters

Parker offers hydraulic filters and replacement elements for most marine applications. Parker offers a wide array of interchangeable elements to provide solutions for suction, pressure and return line applications.

Racor filters respond when engines demand heavy-duty, high-capacity water separation and fuel filtration. Racor offers the most complete, efficient, and reliable engine protection you can install.

Velcon provides leading fluid filtration products that filter, purify, and remove water from hydrocarbon fuels, oils and other fluids for a wide variety of markets throughout the world.

Onboard Water Purifiers

Parker Village Marine and **Horizon Reverse Osmosis** manufactures a wide variety of framed, modular and semi-modular watermakers for defense, commercial marine, oil & gas, land-based disaster relief, drinking and industrial & process water.

Hope Direct

Orders Ship in 1-2 Days

Visit HopeDirect.com for purchases 24/7 of Parker hose, fittings, adapters, and select hydraulic components.
