

The Hope Group

Marine Product Line Card

Marine Hose & Fittings

TRIDENT MARINE SYSTEMS manufactures hose for all marine applications including fuel, sanitation, potable water and bilge. Trident hose is specially designed to provide long term performance and resistance to its fluids and aging.

DIXON VALVE & COUPLING manufactures a complete line of adapters, couplings, hose menders, king nipples, nozzles, quick connect fittings, repair and replacement parts.

HBD/THERMOID INDUSTRIES manufactures a long list of general purpose hose products, including BellowsFlex "B", which is designed for marine applications including bilge ventilation, cabin heating, internal water systems, galley and drains.

PARKER HYDRAULIC HOSE meets SAE, USCG and ISO standards. Used with steel, stainless steel and brass field attachable or crimped fittings. The Hope Group fabricates marine steering, power tilt and marine hydraulic hose assemblies.

LAWRENCE HOSE / NOVAFLEX hose is designed for a wide range of water transfer/discharge applications and the tough demands of wet exhaust. An excellent choice for bilge, toilet, scupper and water discharge applications.

Marine Steering

JASTRAM ENGINEERING designs and manufactures a whole line of marine steering systems, including manual steering, modular systems including controls, motor starters and alarms, hydraulic power systems and more.

UFLEX USA manufactures hydraulic steering systems specifically for the marine environment, using materials and working process which offer long life and safety for the most extreme conditions.

PARKER OILDYNE provides small, compact self-contained hydraulic power units for point of use operation. Ideal for tilt systems and small davits.

Marine Anchoring Systems

MUIR offers complete anchoring systems including pleasure craft windlasses, mega yacht windlasses, commercial deck equipment and hydraulic systems packages for vessels up to 300 feet and more in length.

Marine Control Systems

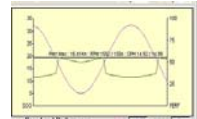

MARINE HYDRAULICS offers a broad range of products for Marine motion control applications including: steering systems; proportional controls; fuel and water systems; central hydraulic power systems and customized solutions.

WESMAR is a world leader in Sonar, Bow Thrusters and Roll Fin Stabilizers for the commercial and recreational marine applications. Its innovative double-thrust bow thruster provides 40 percent more thrust than conventional single-prop designs.

MICAD MARINE is a premiere PC-based marine software and hardware system that provides engine monitoring, accurate fuel management, complete vessel systems monitoring and video integration.

IQAN by PARKER is a state-of-the-art system for electronically controlling and monitoring hydraulics on marine vessels. IQAN also communicates with other onboard systems and displays data for diagnostic information.

Marine Filters

PARKER offers hydraulic filters and replacement elements for most marine applications. Parker offers a wide array of interchangeable elements to provide solutions for suction, pressure and return line applications.

RACOR is the preferred brand and single source for the most complete line of high performance marine engine filtration systems. If the application calls for fuel, oil, engine air, water, crankcase, ventilation or hydraulic filtration, Racor is the solution.

Marine Custom Motion Systems

THE HOPE GROUP provides hydraulic, pneumatic and electrical "customized systems" solutions to marine motion applications, including:

- Anchor Windlasses
- Bow / Stern Thrusters
- Hatch & Windshield Lift Systems
- Jet Drive & Bucket Controls
- Steering Systems
- Trim Tab and Motor Tilts
- Winch / Capstans
- Stabilizers
