

PRODUCTS

- ABEX Servo valves
- Air Compressors
- Air Dryers
- CEMS Multi-tube Instrumentation Bundles
- Diagnostic Tools
- Expansion Joints
- Filter Elements
 - Hydraulics
 - Fuel Oil
 - Natural Gas
 - Inlet Air
- Filtration Systems
- Fluid Conditioning
- Heat Exchangers
- Hydraulic Components
- Hydraulic Hoses
- Hydraulic Power Units
- Inlet Fogging Systems
- Inlet Fuel Nozzles
- Nitrogen Generators
- Process Control Valves
- Stainless Fittings

The Hope Group Provides Power Plants with Solutions

The Hope Group has been providing Power Plants and other industrial customers with hydraulic, pneumatic and fluid connector products for over 50 years. Power Plants throughout the region utilize the hydraulic power units, cylinders, and filtration systems from Parker, as well as, compressors from Kaeser, solenoid valves from Skinner, and ABEX Servo valves.

Using the latest technologies, the engineers and technicians at The Hope Group have developed solutions to improve emissions performance, minimize waste, meet environmental regulations, monitor air and water quality, offer longer component life, and create greater fuel efficiency. The goal is to increase MW output, reduce operating costs, extend component life, reduce maintenance costs and reduce emissions through greater efficiencies.

Specialized Components

For fossil fuel plants, combined cycle plants, and combustion turbine plants, The Hope Group has specialized components and systems to meet the most demanding power generation applications. From hydraulics and pneumatics to electromechanical, instrumentation, filtration, sealing, emissions controls, fluid connections, fluid monitoring, and HMI, you can rely on The Hope Group and its premium products from Parker, Kaeser, GE, Skinner, and other leading manufacturers.

The Hope Group operates from its eight strategically located branch offices in four of the six New England states. The 140 employees of The Hope Group include 25 experienced sales engineers, 40 hydraulic and compressed air service team and fabrication/installation technicians, and 30 factory-trained customer service support personnel. There is no comparable resource for Power Plant operators to rely on in the region for the full-range of MRO products and services than The Hope Group.
