

iZap *Internet-Based Barcode Scanning System*

CUSTOMER ADVANTAGES

- Automate bin management programs
- Automate consigned inventory programs
- Automate KanBan replenishment programs
- Use one barcode system for all supplier P.O.'s
- Use one common scanner for all suppliers
- No software to maintain or purchase
- Optional consolidated EDI invoice for all suppliers

iZap Implementation Process

The implementation process is very simple. Working closely with the customer, the iZap team will identify the part numbers and part inventory locations. The distributor and the iZap team will confirm the information and start the process of creating barcode labels, including attaching them to the bins and racks. Once the parts are identified, labels printed and attached, the system is ready for scanning and ordering.

iZap Applications

- Automated remote order entry
- Bin management
- Breadman delivery route
- Consigned inventory
- Customer managed inventory
- KanBan/Lean process
- Integrated supply
- Service vans
- Vendor managed inventory

iZap Ordering Process

- Ordering is a simple five-step process:
- Scan barcode labels
 - Transmit order to iZap web server
 - Electronic order received and electronic acknowledgement sent
 - Item picked, packed and delivered
 - Product received and invoice sent

iZap Short Story

The Hope Group
 70 Bearfoot Road
 Northborough, MA

 Fax: 508-393-8203
 Website: www.TheHopeGroup.com

iZap is an Internet-based barcode scanning system that allows users to automate their Purchase Order to Invoice process. Customers benefit from reduced errors in ordering and more accurate and timely invoicing. The iZap system is easy to install, simple to use and highly reliable. There is now an iZap BlackBerry solution which permits users to send scanned orders instantly.

Other iZap advantages include the ability to order multiple part numbers from multiple suppliers from anywhere in the world through the use of a common barcode scanner, plus the simplicity of one consolidated EDI invoice. Easy, accurate and cost-effective is the iZap short story.
